About Me

I'm a web developer with a keen interest in mobile development. I aspire to work for a company with a meaningful product; one that has a culture of compassion and diversity and which has the room for me to leverage my skills in web development and deepen my knowledge of mobile.

Skills

Interpersonal
> Pair programming, Engineering Empathy, A.S.K. Feedback, Agile Development

Technical
> Ruby, Rails, Sinatra, JavaScript, jQuery, HTML, CSS, Java, AJAX, AngularJS, Git, PostgreSQL, Heroku, RSpec, REST, JSON, OAuth, MVC, OOJS

Projects

WeThePAC - Android App (Google Play Store)
- > **View activity on wethepac.net live from mobile**
- > Wrote independently in Java in four days as a final project stretch goal
- > Consumes Rails 4 API, create & display POJOs modeling each representative or user

WeThePAC.net
- > **Express yourself in America's political clime by pledging and Tweeting at your elected representative when they perform an action you support.**
- > Implemented core functionality in the Rails 4 backend
- > Engineered routes serving JSON to the Javascript (jQuery, Handlebars, AJAX) frontend
- > Built functionality, features, and polish with Javascript on the frontend

Rockshoe.me
- > **Discover rock climbing shoes that other rock climbers have found to fit their feet.**
- > Designed with mockups, built on Sinatra, presented with JavaScript
- > Serves pages with Sinatra, backed by a Heroku PostgreSQL database; loads elements with AJAX and jQuery; and allows login (mirrored on its own database) via Facebook OAuth.
